

# ATESS 20HCL 4MJ 20HCL 5MJ

## LEADING - EDGE TECHNOLOGY

### Overview

ATESS 3.993/5.015MWh 20-ft liquid-cooled ESS container integrates PACK, EMS, BMS, HVAC, and fire safety system into one cabinet. Compared with air cooling, liquid cooling empowers the ESS product with higher power density and ensures the temperature difference between the cells within 3 °C, which effectively extends battery service life and improves energy efficiency. The 20-ft liquid-cooled ESS container product can be applied to the power generation side, grid side, as well as C&I ESS scenarios that have strict requirements on power and capacity.

### Features

- ▶ **Liquid cooling**  
Higher heat transfer coefficient than that of air cooling, remove heat more quickly and efficiently.
- ▶ **Higher Density**  
5.015MWh batteries in a 20ft container, providing higher energy density, and saving costs.
- ▶ **Lower Local Power Consumption**  
The variable-frequency compressor adjusts its operating status based on temperature conditions, thus reducing the equipment's power consumption.
- ▶ **Higher Protection**  
IP55(PACK IP65) high protection level & C4 protection level, and the high/low-temperature design. Can be used in harsh environments.
- ▶ **Longer Service Life**  
The temperature consistency of battery cell temperatures extends the service life and enhances the safety of batteries, and increases returns.
- ▶ **Better Temperature Control**  
The liquid cooling scheme reduces the battery cell temperature difference by 200% that of air cooling, keeping the temperature difference within 3°C
